

Whirlybird

20

Suitable for damp locations

The Whirlybird fan is the only contribution by an outside designer for The Modern Fan Co. Laurinda Spear has brought her taste and creativity to our collection with this innovative glass fan. The Whirlybird is constructed of die-cast aluminum components covered by mouth-blown glass. The fan is offered with our standard opal white glass or a playful combination of etched clear glass and a painted blue interior, producing a subtle glow of color. 75 watt halogen lamp included.
